

m-tec® M200

With its sophisticated technology, the m-tec® M200 makes it possible to achieve perfect gypsum plasterboards in a perfect time. With an output of 0.5 - 2 m² per minute, the m-tec® M200 puts manual processing of gypsum products in shame.

m-tec® M200 Applications

The powerful small mixing pump is especially suitable for thin coat plaster, smoothing plaster and other thin coat plaster products.

m-tec® M200 Scope of supply

In the plaster version, the mixing pump is supplied with with compressor, rotor/stator, hose pressure gauge, flow pressure gauge, flow meter and accessories.

m-tec® M200 Accessories

Many additional parts such as variable rotors / stators, post-mixers, top hoppers or vibrators are available for completion, please contact us.

Technical data	M200
Delivery rate:	approx. 13 l/min variable with other worm pumps
Delivery distance:	up to 15 m
Delivery height:	up to 5 m
Delivery pressure:	up to 25 bar
Pump motor:	2,2 kW
Compressor:	1,1 kW, approx. 125 l/min, 3,5 bar
Electrical connection:	230 V, 50 Hz, 1 ph
Fuse protection:	16 A
Supply line:	3 x 2,5 mm ²
Plug-in device:	16 A 3 P 6 h
Water connection:	¾" Water hose with GEKA coupling, required water pressure/min. 2,5 bar with running machine
Dimensions:	approx. 1170 x 590 x 1060 mm
Weight:	approx. 110 kg

Capacity, distance and height are dependent on the material being conveyed and the stator and rotor used.

m-tec M200-EN

m-tec® M200

Maneuverable mixing pump

*m-tec® M200:
Takes the processing
of thin-layer gypsum
products to a new level*

Die m-tec® M200 is a compact, easy-to-use mixing pump that is ideal for machining perfect plasterboard walls. The m-tec® M200 provides lump-free mixing of the gypsum products used, especially with fillers.

Plus points

The m-tec® M200 is designed to process a wide range of gypsum products and therefore has several easily adjustable working speeds. But to really deserve the „m-tec“ label, one detail is still missing. That is why our engineers have combined this mixing technology with easy cleaning - m-tec® Easy-Clean!

Cleaning

The proven m-tec easy-clean technology reduces deposits and ensures fast, residue-free cleaning.

Performance

The powerful drive technology has enough power to handle even the most demanding jobs. that makes work fun!

Handling

Its ease of use, disassembly and compact design make the job site much easier.

^ Easy to disassemble and clean.

^ This makes work fun: efficient and economical!

Redevelopment

Floor Levelling Compound

Plastering

m-tec® technology for better building

m-tec® develops and manufactures construction site equipment for traditional applications as well as for tasks on modern construction sites: From the transport and supply of dry mortar products to their application on site, we provide you with everything from a single source. Throughout the world, in almost 100 countries, m-tec® has made construction better, faster and, above all, more economical.

That makes us unique.

And to make sure it stays that way, we stay on the ball with our partners when it comes to new developments.

For example, m-tec® has accompanied the development of 3D concrete printing, contributing to the success of this new technology.
