ROTAMIXER®

RM65 & RM90 ROTAMIXER®

- robust forced action paddle mixers
- stainless steel adjustable paddles
- twin paddles for thorough mix action
- radial & axial mix, turns & lifts material
- easy clean for epoxies & cements
- produced in the UK

The RM65 & RM90 mixers are robust forced action mixers designed for those materials that can't be successfully mixed in a conventional free-fall cement mixer

The rotating drum produces a centrifugal mix and the technically designed paddles generate a radial and axial action

The machines are easy to clean and maintain, and replacement mixing tubs are economically priced. The machine includes a stainless steel L shaped side paddle and a rotary claw paddle which will mix right up to the tub centre, sides and base

The RM65 is a compact forced action mixer for up to two bags of repair or fibre filled mortar, grout, epoxy, screed, flooring latex and coatings, tile adhesives and special plasters. The RM90 can mix up to three bags

These mixers are produced with a 110v high torque motor and sealed gear box; 230v and 415v motors are also available for both models
